a
measured excess NLL (nats)
predicted level of decoded state (nats)
I pair states (80)
II hi (34)
II lo (15)
III (40 + 80 faded)
b
decoded networks (III)
escape percentile u (0 = slowest)
own kernel (mean 0.13)
other families (mean 0.45)
c
decoded networks (II, hi)
involution rank (slow → fast escape)
slowest state: 31 of 34
